

Unified K12 School Safety Platform

Prepare | Prevent | Mitigate | Respond | Recover

Dedicated to helping schools improve emergency preparedness, response, prevention, and recovery, CrisisGo's Safety iResponse provides comprehensive safety solutions to empower every stakeholder in each step of school safety. CrisisGo Safety iResponse is here to support your school in any emergency, any location inside or outside campus.

CrisisGo's Safety iResponse platform is fully aligned with I Love U Guys' Standard Response Protocol (SRP) and the Standard Reunification Method (SRM), and certified by FirstNet to guarantee trusted network connection and successful emergency communication and response.

SAFETY & EMERGENCY COMMUNICATION

- **Silent Panic Alert**

Various silent panic buttons are available for different roles and occasions, including mobile/desktop apps, wearable buttons, mounted buttons, and security Push-To-Talk handsets. Together, they enable campus staff and teachers to quickly initiate silent alerts in case of an emergency.

- **911 & First Responder Escalation**

Instantly escalate critical alerts to 911 PSAPs and local first responders with access to situation progress and resources in real time.

- **Mass Notification**

Flexible mass notification via multiple channels including app, SMS, email, PA, call, digital display, and more.

- **Reunification**

With 2-way communication, connect all staff, track all students' and staff's safety status, and reunify students with parents with maximized efficiency.

- **Drill Management**

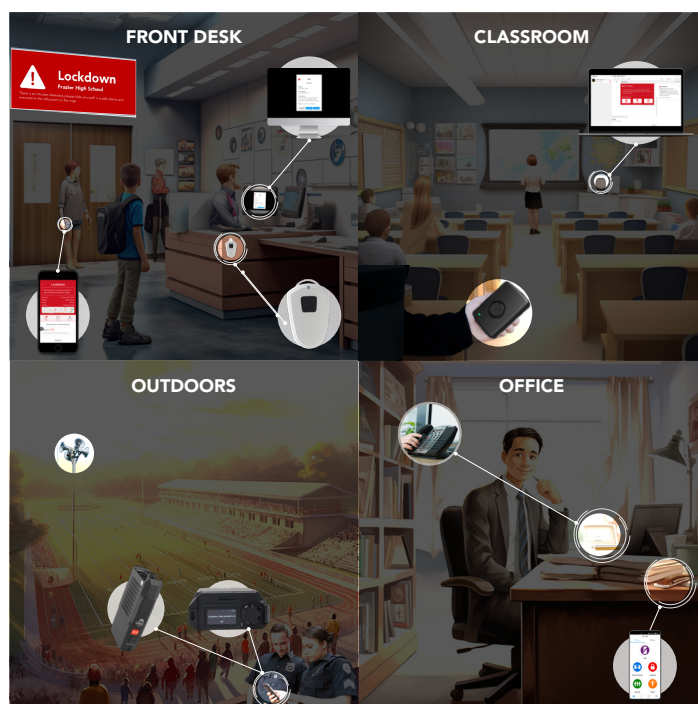

Efficiently schedule, conduct, and track safety drills to comply with school requirements. Reduce risk of non-compliance with detailed reports and reminders.

- **Safety Team Communication**

Empower school safety team with robust emergency communication using Push-To-Talk devices powered by FirstNet. Seamlessly connect with all staff, district administrators, and first responders.

- **Safety Notification**

Notify staff, students, and parents of safety information with flexible notification system by app, SMS, and email.

EMERGENCY COMMAND & RESPONSE

With Smart Emergency Operation Center (Smart EOC), keep first responders and district admins updated on school emergency progress and building floor plans, coordinate response, and evacuate all staff with seamless efficiency.

THREAT REPORTING

Collect potential risks and threats from people, IOT, AI, and integrated systems with smart threat detection. Enable all school stakeholders to report risks anonymously via SMS, email, web app, and call.

SAFETY COMPLIANCE & MANAGEMENT

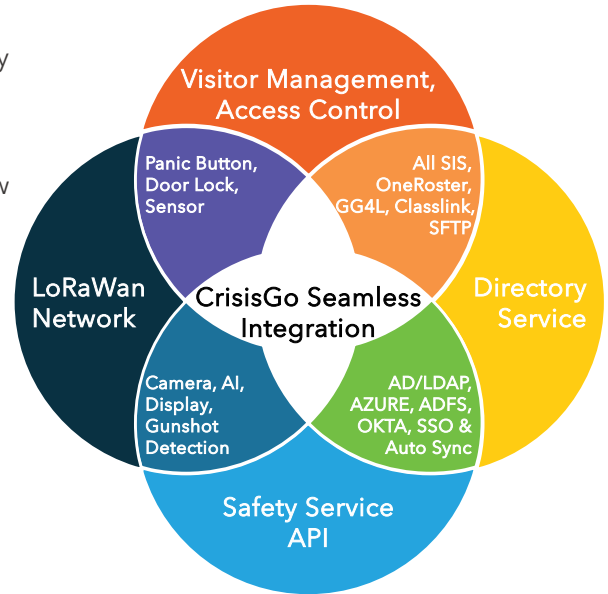

CrisisGo’s Risk Management Dashboard consolidates various security technologies into one view, providing an easily customizable risk score model for instant risk identification and assessment. Empower superintendents, region administrators, district safety directors, and school principals to make better-informed decisions with an overview of potential risks and hazards gathered from real-time data of the school’s security systems.

EASY SETUP & INTEGRATIONS

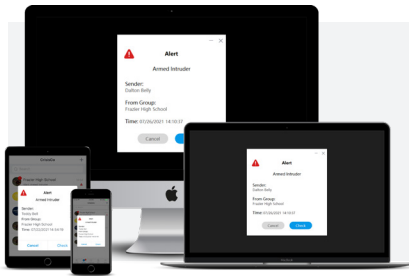

CrisisGo’s open integration infrastructure makes it easy to integrate with various systems and devices to make one unified school safety system.

EASY WINS & CONTINUED SUCCESS

CrisisGo helps schools to create a safety culture that is not only built on a solid foundation with a clear pathway to growth, but is also sustainable and generational. Dedicated Project Manager and Account Manager are assigned for each customer to guarantee the success in every school.
