Operational Guidance for Implementing The Standard Response Protocol In a Higher Education Environment

Version 4.0

ISBN-13:
SRP REVIEW COMMITTEE
The “I Love U Guys” Foundation SRP Review Committee is comprised of safety stakeholders from a variety of perspectives and professions. The charter of the committee is to advise on the merits of any substantive changes to The Standard Response Protocol. This ensures that changes will not be incorporated into the SRP without consideration or deliberation.

The SRP Review Committee communicates on substantive changes to the SRP primarily through the electronic means of email or teleconference.

The following are the current members of the SRP Review Committee.

Kevin Burd, Detective Lieutenant (Ret.), Priority of Life Training and Consulting, Hampton, NJ
Kristen Devitt, M.Ed., CTM, Director, State of Wisconsin Department of Justice, Office of School Safety
Jaclyn Schildkraut, PhD, Associate Professor, Department of Criminal Justice, State University of New York at Oswego

SPECIAL THANKS
Joleen Reefe - City and County of Broomfield (Joleen coined the phrase, “Locks, Lights, Out of Sight.”)
Pat Hamilton – Chief Operating Officer, Adams 12 Five Star Schools, Colorado
John McDonald – Executive Director, Safety, Security and Emergency Planning, Jefferson County Public Schools, Colorado
Heidi Walts – Commander, Northglenn Police Department, Colorado
Marta Alejandro – Spanish teacher and bilingual educational support professional / Spanish translator and interpreter

CONTACT INFORMATION
The “I Love U Guys” Foundation can be reached online at http://iloveuguys.org.
Email: srp@iloveuguys.org.

REQUEST FOR COMMENT
The Standard Response Protocol is a synthesis of common practices in use at a number of districts, departments and agencies. The evolution of SRP has included review, comment and suggestion from a number of practitioners. As of 2020, the SRP has been subjected to tactical scrutiny by hundreds of law enforcement agencies and operational review and adoption by thousands of schools.

Suggestions for modification can be made via email at srp_rfc@iloveuguys.org. Please include contact information, district, department or agency, including day time phone.

WARNINGS AND DISCLAIMER
Every effort has been made to make this book as complete and accurate as possible, but no warranty or fitness is implied. The information provided is on an “as is” basis. Please visit our website (https://iloveuguys.org) for the detailed information.
“Tactics are intel driven.”
What we plan is based on what we know.

“But the environment dictates tactics.”
But what we do, is based on where we are.

— Deputy Chief A.J. DeAndrea
— Civilian Translation: John-Michael Keyes

THE “I LOVE U GUYS” FOUNDATION

On September 27th, 2006 a gunman entered Platte Canyon High School in Bailey, Colorado, held seven girls hostage and ultimately shot and killed Emily Keyes. During the time she was held hostage, Emily sent her parents text messages... “I love you guys” and “I love u guys. k?” Emily’s kindness, spirit, fierce joy, and the dignity and grace that followed this tragic event define the core of The “I Love U Guys” Foundation.

MISSION
The “I Love U Guys” Foundation was created to restore and protect the joy of youth through educational programs and positive actions in collaboration with families, schools, communities, organizations and government entities.

COMMITMENT
There are several things we are committed to. The most important thing we can do is offer our material at no cost to schools, districts, departments, agencies and organizations. The reason we are able to continue to provide this service is due, in part, to the generosity of our donors and Mission Partners (see Partner with Love on the website). The “I Love U Guys” Foundation works very hard to keep our costs down as well as any costs associated with our printed materials. Donor and Mission Partner support allows us to stretch those dollars and services even more. Your gift, no matter the size, helps us achieve our mission. Your help makes a difference to the students, teachers, first responders, and the communities in which we live and work.

ABOUT THIS BOOK

For SRP 2021, the Hold action is incorporated into the Standard Response Protocol.

Also for SRP 2021, the Lockout action is being changed to Secure.

As you begin to implement and drill the protocol, keep in mind that environments are different. What that means is that we provide you with some tactics. Things we know. But your school, your campus, your agencies, and your environment will ultimately dictate what you do.

Please, in your planning, if you see something here that doesn’t seem to work in your environment, figure out what does. Let us know.

COPYRIGHTS AND TRADEMARKS
In order to protect the integrity and consistency of The Standard Response Protocol, The “I Love U Guys” Foundation exercises all protection under copyright and trademark. Use of this material is governed by the Terms of Use or a Commercial Licensing Agreement.

COMMERCIAL LICENSING
Incorporating the SRP into a commercial product, like software or publication, requires a commercial license. Please contact The “I Love U Guys” Foundation for more information and costs.

TERMS OF USE
Schools, districts, departments, agencies and organizations may use these materials, at no cost, under the following conditions:

1. Materials are not re-sold
2. Core actions and directives are not modified
2.1. Hold - “In Your Room or Area. Clear the Halls”
2.2. Secure - “Get Inside, Lock Outside Doors”
2.3. Lockdown - “Locks, Lights, Out of Sight”
2.4. Evacuate - A Location may be specified
2.5. Shelter - followed by the Hazard and the Safety Strategy

3. The Notification of Intent (NOI) is used when the materials are being evaluated. A sample NOI can be downloaded from the website, and is provided to The “I Love U Guys” Foundation through one of the following:
3.1. Complete the NOI and email it to srp@iloveuguys.org
3.2. Send an email to srp@iloveuguys.org

4. The Memorandum of Understanding (MOU) is used when it has been determined that the materials will be used. A sample MOU can be downloaded from the website, and is provided to The “I Love U Guys” Foundation by emailing it to

srp@iloveuguys.org

5. The following modifications to the materials are allowable:
5.1. Localization of evacuation events
5.2. Localization of shelter events
5.3. Addition of organization logo
CERTIFICATION PROGRAMS
The “I Love U Guys” Foundation is committed to providing its programs at no cost to a widening variety of organizations.

To assess the fidelity of implementation within an organization, the Foundation has developed a certification program for the Standard Response Protocol. The certification program is optional and is not required to use the SRP within your organization.

THE “I LOVE U GUYS” FOUNDATION MOUs OR NOTICE OF INTENT
Some university systems may desire a formalized Memorandum of Understanding (MOU) with The “I Love U Guys” Foundation. Please visit https://iloveuguys.org for a current version of the MOU. The purpose of this MOU is to define responsibilities of each party and provide scope, clarity of expectations. It affirms agreement of stated protocol by schools, districts, departments and agencies. It also confirms the online availability of the Foundation’s materials.

An additional benefit for the Foundation is in seeking funding. Some private grantors view the MOU as a demonstration of program effectiveness.

Another option is to formally notify the Foundation with a Notice of Intent (NOI). This is a notice that you are reviewing the materials but have not adopted them yet. This is also available on the website.

At a minimum, university systems that will ultimately incorporate the SRP into their safety plans and practices should email srp@iloveuguys.org and let us know.

PRIVACY POLICY
When you agree to the Terms of Use by sending an MOU or NOI, your contact information will be entered into a database. You will receive notification when there are updates and/or new materials. You will have the opportunity to opt in to receive periodic blog posts and newsletters via email.

Our Commitment to Program Users: We will not sell, share or trade names, contact, or personal information with any other entity, nor send mailings to our donors on behalf of other organizations.

This policy applies to all information received by The “I Love U Guys” Foundation, both online and offline, as well as any electronic, written, or oral communications.

Please see our website for the full Privacy text.

ONE DEMAND
The protocol also carries an obligation. People are smart. An implicit part of the SRP is that authorities and school administrators tell personnel and students what’s going on.

Note: Student training includes preparation for some alternative methods during a tactical response but reinforces deference to local law enforcement.
INTRODUCTION
This document outlines The Standard Response Protocol (SRP) and offers guidance on incorporating this protocol into a school and campus safety plan for critical incident response.

"SRP is not a replacement... it’s an enhancement to your existing safety plans."

As law enforcement and K-12 schools began to put the SRP into practice, it was a natural progression for colleges and universities to adapt the SRP for their campuses. The intent of this document is to provide basic guidance with respect for local conditions and authorities. The only mandate presented is that organizations retain the “Terms of Art” and “Directives” defined by this protocol.

The SRP is not a replacement for any campus safety plan or program. It is simply a classroom response enhancement for critical incidents, designed to provide consistent, clear, shared language and actions among all students, staff and first responders.

As a standard, SRP is being adopted by emergency managers, law enforcement, school and district administrators and emergency medical services across the country. New materials and updates can be found online at http://iloveuguys.org.

BEFORE YOU BEGIN
Colleges and universities typically have a comprehensive safety program established and executed by dedicated safety or security personnel. That same Safety Team should be responsible for incorporating the SRP into the safety program. Having student, instructor and staff volunteers on the Safety Team can greatly increase the buy-in and participation from all campus safety stakeholders.

If it was not done during the development of the existing safety program, it is highly encouraged that, while incorporating the SRP the safety team establish contact with local emergency services and law enforcement officials as they can help ensure safety plans will not conflict with existing local emergency services protocols.

Be prepared to look at existing plans with a critical eye as often they can be described as a “Directive” of a certain “Term of Art”; i.e. conducting a fire drill is practicing a specific type of evacuation and the actions performed are similar in all evacuation scenarios. It makes sense to teach and train broader evacuation techniques while testing or practicing a more specific directive, like evacuating to the parking lot due to a fire.

STUDENT AND STAFF ACCOUNTABILITY
Unlike K-12, colleges and universities may or may not have attendance policies in place, and rarely is it universal or strictly adhered to. Consequently, accounting for students is problematic at this level. Where attendance is monitored, it will prove useful in the immediate aftermath of a crisis.

EMERGENCY ALERT SYSTEMS
Many colleges and universities now provide their students and staff with emergency alerts through email, text, or voice message when there is an emergency situation on campus.

Beyond sending messages through multiple modes, it has been found that Alert Systems reach a greater percentage of students and staff if they are automatically enrolled, (i.e. opt-out) rather than requiring staff and students to register themselves (i.e. opt-in).

TIME BARRIERS
Historical data on active shooters suggests that a locked room door is a proven life saving strategy. Barricading is another option that has a positive track record. Self evacuation is another option. These strategies all provide a "Time Barrier" between students, assailants.

Time barriers or measures taken beforehand to ‘harden the structure’ can be an invaluable asset to safety; not only for staff and students, but also visitors to a campus who expect a friendly and secure environment.

Time barriers are best described as a physical barrier that slows down the entry into, or movement through, a facility. Any additional delay allows trained persons to take further protective action and gives first responders more time to arrive.

An example of a time barrier is making the exterior doors of a building automatically lock or having them remotely lockable, and could include installing a film on glass door panels to prevent them from shattering, thereby delaying an intruder's attempt to break into the premises.

For a lecture hall, or where it is not possible to keep the doors locked during operating hours, having a single point of entry that can be monitored could give enough time to identify a threat and take preventive action.
THE STANDARD RESPONSE PROTOCOL
A critical ingredient in the safe campus recipe is the uniform classroom response to an incident. Weather events, fires, accidents, intruders and other threats to student and staff safety are scenarios that are planned and trained for by campus administration.

Historically, colleges have taken a scenario-based approach to respond to hazards and threats. It's not uncommon to find a stapled sheaf of papers or tabbed binder in an instructor’s desk that describes a variety of things that might happen, and the specific response to each event.

SRP IS ACTION BASED
The Standard Response Protocol is based not on individual scenarios but on the response to any given scenario. Like the Incident Command System (ICS), SRP demands a specific vocabulary but also allows for great flexibility. The premise is simple: there are five specific actions that can be performed during an incident. When communicating these actions, the action is labeled with a “Term of Art” and is then followed by a “Directive.” Execution of the action is performed by active participants, including students, staff, professors and first responders.

1. **Hold** is followed by “In your Room or Area. Clear the Halls” and is the protocol used when the hallways need to be kept clear of people.
2. **Secure** is followed by “Get Inside, Lock Outside Doors” and is the protocol used to safeguard people within the building.
3. **Lockdown** is followed by “Locks, Lights, Out of Sight” and is the protocol used to secure individual rooms and keep people quiet and in place.
4. **Evacuate** may be followed by a location, and is the protocol used to move people from one location to a different location in or out of the building.
5. **Shelter** is always followed by the hazard and a safety strategy and is the protocol for group and self protection.

These specific actions can act as both a verb and a noun. If the action is Lockdown, it would be announced on public address as “Lockdown! Locks, Lights, Out of Sight.” Communication to local responders would then be “We are under Lockdown.”

Each response has specific student and staff actions. The Evacuate response might be followed by a location: “Evacuate to the Commons.” Responses can also be chained. For instance, “Evacuate to Hallway. Shelter for Tornado. Drop, Cover and Hold.”

**BENEFITS**
The benefits of SRP become quickly apparent. By standardizing the vocabulary, all stakeholders can understand the response and status of the event. For students, this provides continuity of expectations and actions throughout their educational career. For staff, this becomes a simpler process to train and drill. For first responders, the common vocabulary and protocols establish a greater predictability that persists through the duration of an incident. Additionally, this protocol enables rapid response determination when an unforeseen event occurs.

The protocol also allows for a more predictable series of actions as an event unfolds. An intruder event may start as a Lockdown, but as the intruder is isolated, first responders might transition parts of the building to an Evacuation.

**SECURE VS. LOCKDOWN**
The differentiation between Secure and Lockdown is a critical element in SRP. Secure recovers people from outside the building, protects the building perimeter and locks or monitors all exterior doors. This would be implemented when there is a threat or hazard outside of the building. Criminal activity, dangerous events in the community, or even a vicious animal on the grounds would be examples of a Secure response. While the Secure response encourages greater situational awareness, it allows for educational practices to continue with little interruption or distraction.

Lockdown is a room-based protocol that requires locking or barricading the door(s), turning off the lights and requiring occupants remain out of sight of any corridor windows, and remain quiet. It does not mandate locking exterior doors for a few reasons: risk is increased to occupants or staff in exposed areas attempting to lock the doors, and locking exterior doors inhibits entry of first responders and increases risk as responders attempt to breach doors. If the doors are already locked, leave them alone.

Be aware that situations can change quickly. Depending on what’s happening, a Lockdown might change to a Secure condition, or the Secure condition evolves to Lockdown.

**TACTICAL RESPONSES**
SRP also acknowledges that some incidents involve a tactical response from law enforcement, and suggests consultation with local law enforcement regarding expectations and actions.
SRP IN A NUTSHELL
5 ACTIONS
Each protocol has specific staff and student activity that are unique to the action. In the event a student or staff member identifies the initial threat, calling 911 and administration is advised.

HOLD!
IN YOUR ROOM OR AREA. CLEAR THE HALLS.
Students are trained to:
- Clear the halls and remain in the room or area until the “All Clear” is announced
- Do business as usual

Staff is trained to:
- Close and lock door
- Account for students and adults
- Do business as usual

SECURE!
GET INSIDE. LOCK OUTSIDE DOORS.
Students are trained to:
- Move away from sight
- Maintain silence

Staff are trained to:
- Recover students and staff from outside building
- Lock or monitor outside doors
- Increase situational awareness
- Account for students and adults
- Do business as usual

LOCKDOWN! LOCKS, LIGHTS, OUT OF SIGHT
Students are trained to:
- Move away from sight
- Maintain silence
- Do not open the door

Staff are trained to:
- Recover people from the hallway if possible
- Lock or barricade doors
- Turn out the lights
- Move away from sight
- Maintain silence
- Do not open the door
- Prepare to evade or defend

Note: Training includes preparation for some alternative methods during a tactical response but reinforces deference to local law enforcement.

EVACUATE!
TO A LOCATION
Students are trained to:
- Leave belongings behind if required to
- If possible, bring their phone
- Evacuate as a class or individually
- Follow instructions

Staff are trained to:
- Lead students to Evacuation location
- Account for students and staff
- Report injuries or problems at Evacuation Assembly using Red Card / Green Card method

SHELTER!
FOR HAZARD USING A SAFETY STRATEGY
Hazards might include:
- Tornado
- Hazmat
- Earthquake
- Tsunami

Safety Strategies might include:
- Evacuate to shelter area
- Seal the room
- Drop, cover and hold
- Get to high ground

Students are trained in:
- Appropriate hazards and safety strategies

Staff are trained in:
- Appropriate hazards and safety strategies
- Accounting for students and staff
- Report injuries or problems using Red Card/Green Card method.

ONE DEMAND
The protocol also carries an obligation. An implicit part of the SRP is that campus authorities are transparent about what’s going on. People need accurate information for the greatest survivability, to minimize panic, and to mitigate recovery.
Protocol Details Summary
This section of the guidance defines conditions, actions, responsibilities and other aspects of preparing and incorporating The Standard Response Protocol within a school or district safety plan.

Prerequisites: NIMS and ICS
In order to coordinate the use of the SRP in district plans, it is highly recommended that key individuals within the district and those with a role in district/campus emergency operations, complete the following courses through FEMA.

1. IS-100.HE: Introduction to the Incident Command System ICS-100 for Higher Education
3. IS-363: Introduction to Emergency Management for Higher Education

These courses are available online, at no cost, online using the web at http://training.fema.gov. Look under the Independent Study tab.

Anticipate 1 to 3 hours per course to successfully achieve certification. The courses are offered at no charge. Note: The “I Love U Guys” Foundation is not affiliated with FEMA.

Campus Safety Program
Colleges and universities incorporating SRP must have, or be working to, develop written safety plans and ongoing safety programs as identified in the safety plan.

The Absence of Locks or Keys
Often in a college and university environment much of the facility lacks the physical capability to lock interior doors. Where lecture halls, auditoriums, labs or classrooms do have locks, often the instructor or professor is not provided the key. Yet, the value of a locked or barricaded door has historically proven to reduce injury or death in cases of active violence. This conundrum can be partially mitigated through student orientation or staff training.

Training would include identification of un-lockable doors, identification of egress points, and barricade strategies.

Doors, Locks, Stress and Fire Marshals
A consistent observation by first responders is that human beings, under stress, have difficulty completing even mundane tasks when they are under stress. The otherwise simple task of locking the door may become extremely difficult for an instructor who has just heard a Lockdown order. Elevated adrenaline levels may result in the loss of fine motor skills and often result in extended times to insert a key and lock a door.

It’s important to discuss security options and modification with local fire authorities. Some will allow a locked classroom door to be propped open during the day, while some will not. Variances in local Fire Codes and application will help determine the options for your schools.

Resources and Creating Relationships
Throughout this book, you’ll see quite a few suggestions to contact your local or regional responders, whether it’s law enforcement, university police departments, emergency services or fire departments. Communication with these local resources is essential.

In most areas, schools are the largest population centers during a school day, so it makes sense to utilize the advice and services those agencies provide. Additionally, some county emergency managers are equipped to assist with your safety planning. Some schools are able to engage with their regional Department of Homeland Security for training resources.

Take a look around your county and state and see what’s available.

Memoranda of Understanding
Establishing a Memorandum of Understanding (MOU) and/or Mutual Aid Agreement (MAA) between stakeholders is imperative. Formalized MOUs are a requirement for full adherence to the SRP and should be reviewed and renewed on a scheduled basis.

The “I Love U Guys” Foundation MOUs or Notice of Intent
Some colleges may also desire a formalized MOU with The “I Love U Guys” Foundation. Sample MOUs are provided in this guide for that purpose. The purpose of this MOU is to confirm adherence to the protocol by campuses, departments and agencies. It also confirms the online availability of the Foundation’s materials.

At a minimum, colleges and universities that will ultimately incorporate the SRP into their safety plans and practices should formally notify the Foundation with a “Notice of Intent.”

Liaisons and Other MOUs
The college, department or agency should have a dedicated liaison and a Memorandum of Understanding with city, county or parish law enforcement agencies, fire departments, emergency medical services and emergency managers.
COMMUNICATION
Every campus Emergency Operations Plan (EOP) should contain a section for communicating both internally and externally during a crisis situation.

In any type of event, clear and well-planned communication is essential. Depending on the type of incident, you might have only minutes to prepare a statement and communicate it to the appropriate people.

Primarily, give the staff and students as much information as possible so they can make informed decisions about their actions. If little is known about the situation, tell them that. Communication to the community is critical as well.

INCIDENT COMMAND
When your Safety Team is creating an EOP, they’ll include some level of the Incident Command System (ICS), which is the hierarchy of authority and responsibilities. One role in ICS is the Public Information Officer (PIO) and this role can be used on a daily basis.

Many schools have a full time Communication/PIO supervisor. Within a school, there is usually at least one person who manages the low level event and activity communication along with their primary job.

High level event information should be handled by a competent and well versed individual who provides information that is clear, concise, and complete enough in content to further the mission.

Create a policy for protocol and content for each communication channel to maintain consistency.

CHANNELS
Decide which methods of communication are the best fit for your community. This is reliant on your community’s internet bandwidth, cell phone service and other preferences. Whatever you choose needs to be reliable, fast, and reach a high percentage of the community members. Document who on the Communication Team has access to update each channel.

Also, think about which channels are used regularly for day to day messaging, like emails, and consider using alternate methods for emergencies such as text and phone, which may not be used as frequently. Doing so will alert the recipients that this is not the daily message, but something more important.

TIME
For certain incidents there are only a few minutes to prepare. If Law Enforcement or Fire is involved, people will hear about an incident quickly. Reaching your stakeholders immediately with any type of message acknowledging the incident is essential. Have some basic message formats approved and ready to use.

CONTENT
Not every situation needs immediate text messages and emails, so it’s important to determine what is warranted and when. Less urgent situations—a school cancellation with ample notice, for example—might warrant an email, mass phone message and website update, whereas an evacuation requires mass phone calls and text messages to ensure that information is received quickly.

An initial message can be as simple as stating that something has happened, and telling stakeholders where to find updates. Since most campuses have a number of buildings, give very specific location information because people are almost always moving around between areas.

Include only the factual information you have; do not speculate. The recipients of your outgoing messages must be able to trust in the validity of the content.

Any situation that requires emergency communication for an incident will also require a follow-up.

PREPARATION
A tabletop exercise is a start; basically it’s a brainstorming session. Your Communication Team can talk through possible scenarios and formulate messaging accordingly. They must think about what immediate information is necessary, how to follow up, and who they will need to speak with/follow to receive trusted updates.

Use the 27/9/3 rule during message preparation. This is a very basic recommendation and suggests using a total of 27 words, which can be spoken in about 9 seconds, containing three or fewer key points.

The team should pre-script some basic messages that may be sent out, with blank spaces for details like time and date. Having these pre-approved and available will aid the team later if they’re under stress or time constraints.
Hold Protocol is called when there is a situation requiring people to remain in their rooms or areas in a building for short periods of time. For example, an altercation may require keeping people out of the halls until it is resolved. A medical issue may require only one area to be cleared, with halls still open in case outside medical assistance is required.

There may be a need for people who are not in a room to proceed to an area where they can remain safe and out of the way.

Public Address

The public address for Hold is: "Hold in your room or area. Clear the Halls." and is repeated twice each time the public address is performed. There may be a need to add directives for people who are in a location where they should remain until the hold is lifted.

"Hold in your room or area. Clear the Halls. Hold in your room or area. Clear the Halls."

Public Address - Release

A Hold can be released by Public Address.

"The Hold is released. All Clear. The Hold is released. All Clear."

Incident Command System

The Incident Command System should be initiated.

Actions

People are to remain in their room or area, even if a class is over, until the all clear is announced.

People in common areas, such as libraries or foyers, may be asked to remain in those areas or move to adjoining areas.

People outside of the building should remain outside unless otherwise directed.

Responsibility

Typically, office staff and campus safety teams are responsible for initiating a Hold, however anyone should be able to call for a Hold if they observe something happening that would require this action.

Preparation

Campus training.

Drills

Hold should be drilled at least once a year to create familiarity with the actions.
**SECURE**
Get Inside, Lock Outside Doors.

**SECURE GET INSIDE, LOCK OUTSIDE DOORS.**
The Secure Protocol is called when there is a threat or hazard outside of the campus buildings. Whether it’s due to violence or criminal activity in the immediate neighborhood, or a dangerous animal in the vicinity, Secure uses the security of the physical facility to act as protection.

**PUBLIC ADDRESS**
The public address for Secure is: “Secure! Get Inside. Lock outside doors” and is repeated twice each time the public address is performed.

“Secure! Get Inside, Lock outside doors.
Secure! Get Inside, Lock outside doors.”

**MASS NOTIFICATION**
Where mass notification is used in lieu of public address, the message should be similar to “Secure! Get inside. Lock outside doors.” Or it may include a single building name or portion of the campus.

**ACTIONS**
The Secure Protocol demands bringing people into a secure building, and locking or monitoring all outside access points.

Where possible, educational activities would continue uninterrupted. Events and classes being held outside would be temporarily abandoned and people brought into the nearest building until the situation is resolved.

There may be occasions when people expect to be able to leave the building - end of classes, job commitment, etc. Depending on the condition, this may have to be discouraged.

During the training or orientation, it should be emphasized to students and staff that they may be inconvenienced by these directives, but their cooperation is important to ensure their safety.

**INCIDENT COMMAND SYSTEM**
The Incident Command System should be initiated.

**MONITORED ENTRY**
When there is a perceived threat but it’s not immediate, anyone entering the building is monitored if there is staff to do so. Since colleges and universities have people moving through the buildings frequently, this may be challenging. People moving between buildings or going to a parking lot might be escorted with a heightened awareness.

**RESPONSIBILITY**
Depending on the building, staff who have a permanent workspace there may be required to lock access points. People assigned “Primary Responsibility” for a Secure Zone should be identified in advance and should actively drill the protocol. A Secure Zone may include doorways, windows, loading docks, and fire escape access points. The assigned staff is designated as having “Secure Duty.”

Assign someone to attach the Secure posters, out-facing, to building entry doors to alert people of the Secure condition.

**REPORTED BY**
Secure is typically reported by emergency dispatch to the school office. Office staff then invokes the public address and informs administration.

It may also be reported by students, staff or teachers if a threat is directly observed outside of the building.

**PREPARATION**
Identification of perimeter access points that must be locked in a Secure event defines the perimeter. Logical areas, building wings or other access point groupings define individual “Secure Zones” within the perimeter.

Some colleges may have campus perimeters in addition to building perimeters, such as gates and fences. There may be conditions where the campus perimeter would or would not be affected by Secure.

Individual Secure Duty Checklists should be created for each person assigned with either Primary or Secondary Secure Duty.

Consider different levels of training for full-time staff, adjuncts, contractors and students. Each group has a different level of responsibility and knowledge regarding the campus. For example, resident assistants in dorms will have different types of training responsibilities and concerns than an instructor. Contractors providing daily services will need to be trained along with staff for the best outcomes.

**DRILLS**
Secure drills should be performed at least twice a year and should include full-time staff, adjuncts, contractors and students. At least one should be performed while outdoor activities are in progress.

**CONTINGENCIES**
There may be physical attributes to the campus that mandate special handling of a Secure event. An example would be a campus where modular buildings are present. If the modular building cannot be secured, it may be best for people to Evacuate to a securable building. Listen for specific additional directives.

If, during a Secure event, an additional hazard manifests (i.e.: fire, flood, hazmat), then additional directives will be given for the appropriate response.
**LOCKDOWN**

**Locks, Lights, Out of Sight**

**LOCKDOWN**

**LOCKS, LIGHTS, OUT OF SIGHT**

Lockdown is called when there is a threat or hazard inside a building. Lockdown uses room security actions to protect people from an immediate threat.

**PUBLIC ADDRESS**

The public address for Lockdown is: “Lockdown! Locks, Lights, Out of Sight!” and is repeated twice each time the public address is performed.

“Lockdown! Locks, Lights, Out of Sight! Lockdown! Locks, Lights, Out of Sight!”

**MASS NOTIFICATION**

Where mass notification is used in lieu of public address, the message should be similar to “Lockdown! X Building. Locks, Lights, Out of Sight! There is an active shooter.” Identify both the location and the nature of the threat.

**ACTIONS**

The Lockdown Protocol demands locking or barricading individual room doors or other access points, moving occupants out of line of sight of corridor windows, and maintaining silence.

There is no call to action to lock the building’s exterior access points. Leave the perimeter as is.

Training reinforces the practice of not opening the classroom door once in Lockdown. No indication of occupancy should be revealed until first responders open the door.

If the location of the threat is apparent and people do not have the option to get behind a door, it is appropriate to self-evacuate away from the threat.

**INCIDENT COMMAND SYSTEM**

The Incident Command System should be initiated.

**RESPONSIBILITY**

The instructor or other staff member is responsible for implementing a Lockdown in their room. They should lock or barricade access points and facilitate moving occupants out of sight.

Determine if attendance has changed since the beginning of class, or otherwise try to quietly take account of students and others.

**REPORTED BY**

Lockdown is typically reported by students or staff to the safety personnel. Who then invokes, or instructs administration to invoke, the public address or mass notification. It may also be reported by local emergency dispatch.

Initiating the Lockdown may happen through various methods, or a combination of methods, depending on the procedures and alert systems utilized by each campus. Plan the communication method in advance to set expectations. Regardless of the method(s) of alert notification, the initiation of a Lockdown should be consistent, simple and swift, and include immediate notification of administration and local law enforcement.

**PREPARATION**

Identify room access points that can and should be locked. These may include doorways, windows, loading docks, and fire escape ladder access points.

Staff and students should be trained to not open the door until an administrator or first responder unlocks it.

People should be advised that a Lockdown may persist for several hours, and during an incident silence is essential.

**DRILLS**

Lockdown drills should be performed at least twice a year, or as mandated by the state, and should include full-time staff, adjuncts, contractors and students. If possible one of these drills should be performed with local law enforcement personnel participation. At a minimum, law enforcement participation in the drill should occur no less than once every two years. See the Lockdown Drills section.

**CONTINGENCIES**

Students and staff who are outside of a room during a Lockdown may be faced with the need to get out of sight without the benefit of an empty or open room.

In this situation students and staff must be trained to hide or evacuate themselves away from the building.

If, during a Lockdown, an intruder is actively attempting to enter a room that people are in, or an additional hazard manifests (i.e.: fire, flood or hazmat) then situational decisions must be made, evacuation to a non-usual location or by non-usual means (climbing out a window) may be required, or as a last resort preparing to defend the room or yourself may be necessary.

**EXAMPLES OF LOCKDOWN CONDITIONS**

The following are a few examples of when a school or emergency dispatch might call for a Lockdown.

- Intruder
- Dangerous and violent person
- Domestic issue
- Active assailant

**RED CARD/GREEN CARD**

Red Card/Green Cards should NOT be used for a Lockdown. Based on a number of tactical assessments, the overwhelming consensus is that this practice provides information to an assailant that there are potential targets in that room.
EVACUATE TO A LOCATION
Evacuate is called when there is a need to move people from one location to another.
Most often, evacuations will be necessary when there’s a heating/ventilation system failure, gas leak, or bomb threat in the area. In those cases, people will be allowed to bring their personal items with them. An evacuation drill is very similar to a fire drill.

PUBLIC ADDRESS
The public address for Evacuate is: “Evacuate! To a Location!” and is repeated twice each time the public address is performed. For instance, “Evacuate! To the lobby.”

“Evacuate! To a location.
Evacuate! To a location.”

ACTIONS
The Evacuate Protocol demands students and staff move in an orderly fashion. In a tactical response, students and staff should be prepared to follow specific instructions given by first responders.
First responders may ask students and staff to place their hands on their heads or use different evacuation methods, i.e. run, crawl, cover mouth and nose, etc.

INCIDENT COMMAND SYSTEM
The Incident Command System should be initiated.

RESPONSIBILITY
Safety personnel or a first responder is responsible for initiating an evacuation.

PREPARATION
Evacuation preparation involves the identification and marking of facility Evacuation Points using consistent signage, as well as student and staff training for both normal and tactical evacuations.

EVACUATION ASSEMBLY
The Evacuation Assembly refers to gathering at the Evacuation Assembly Point. Staff are instructed to take roll or record names and account for any missing or extra staff or students after arrival at the Evacuation Assembly Point.

DRILLS
Evacuation drills should be performed twice a year, or as mandated by the state. Fire drills constitute a valid evacuation drill. (Note: Fire Codes often mandate more frequent fire drills.)

CONTINGENCIES
Students are trained that if they are separated from their class during an tactical evacuation, then joining another evacuated group is acceptable. They should be instructed to identify themselves to a staff member after arriving at the Evacuation Assembly.

RED CARD/GREEN CARD
This is for use in an Evacuation Assembly to do a quick status assessment. It is not for classroom use during a Lockdown or Drill. Choose to use the one that’s best for your environment.
After arriving at an Evacuation Assembly and taking roll, the Red/Green Cards are used for administration or first responders to quickly, visually identify the status of the teachers’ classes after an evacuation.

- Green Card (OK) - All students accounted for, No immediate help is necessary
- Red Card (Help) - Extra or missing students, or vital information must be exchanged

- Red and White Cross (Medical Help) - Immediate medical attention is needed

- This includes a roll sheet for users to record who is in their group.

- The Alert card is used to indicate there is a problem in your group and you need assistance.
SHELTER
State the Hazard and Safety Strategy

SHELTER
Shelter is called when specific protective actions are needed based on a threat or hazard. Training should include response to threats such as tornado, earthquake, hazardous materials situation or other local threats.

PUBLIC ADDRESS
The public address for shelter should include the hazard and the safety strategy. The public address is repeated twice each time the public address is performed.

HAZARDS MAY INCLUDE
- Tornado
- Severe weather
- Wildfires
- Flooding
- Hazmat spill or release
- Earthquake
- Tsunami

SAFETY STRATEGIES MAY INCLUDE
- Evacuate to shelter area
- Seal the room
- Drop, cover and hold
- Get to high ground

ACTIONS
Collaboration with local responders, the National Weather Service, and other local, regional and state resources will help in developing specific actions for your district response.

INCIDENT COMMAND SYSTEM
The Incident Command System should be initiated.

RESPONSIBILITY
Each individual is responsible for sheltering. Campuses should have procedures for all foreseeable local hazards and threats which include provisions for those individuals with access and functional needs.

PREPARATION
Identification and marking of facility Shelter areas.

DRILLS
Shelter safety strategies should be drilled at least once a year, or as mandated by the state.

SHELTER - STATE THE HAZARD AND SAFETY STRATEGY
Using the Shelter Protocol and stating the hazard allows for understanding of the threat and the associated protective actions. Most often, the Shelter Protocol is utilized for tornadoes and other severe weather, in which case it would include the shelter location for students and staff, and what protective posture or action they should take.

Sheltering for a Hazmat spill or release is very different. In the case of a Hazmat situation, students and staff would be directed to close their windows, shut down their heating and air conditioning units and seal windows and doors to preserve the good inside air while restricting the entry of any contaminated outside air. Listening to specific directives is critical to a successful emergency response.

PLAIN LANGUAGE
NIMS and ICS require the use of plain language. Codes and specific language that are not readily understood by the general public are no longer to be used. The SRP uses shared, plain, natural language between students, staff and first responders. If there are specific directives that need to be issued for a successful response on a campus, those should be made clearly using plain language. There is nothing wrong with adding additional directives as to where to shelter, or what protective actions should be used in the response.

ABOUT SHELTER-IN-PLACE
There is a long tradition of using the term “Shelter-in-place” for a variety of hazards. While still in common use, the SRP suggests simply stating the hazard and providing a safety strategy.

A deep exploration of the FEMA website found over a dozen different scenarios where “Shelter-in-place” was advised. Two of the most common were for Tornado or Hazmat. Very different actions would be taken for those hazards. A single directive, “Shelter-in-place” doesn’t provide the necessary information. “Tornado! Get to the storm shelter!” is more direct.

CUSTOMIZATION
The classroom poster is sufficient for generic Shelter guidance. The Foundation recognizes that localized hazards may need to be added to the poster. For this reason, the Public Address poster is available in MS Word for customization.
DRILLS vs. EXERCISES

Media coverage exploring issues with lockdown drills potentially causing trauma has resulted in the need for clarification. Much of the coverage attributed the word “Drill” to what was actually an “Exercise.”

School lockdown drills, active shooter drills, and exercises are not synonymous. Nor are they universally defined, understood and practiced. Some of this confusion may be a result of actual FEMA guidance and other publicly available materials on the subject.

DRILL
The primary objective of a drill is for participants to build muscle memory, and practice an action to use in various events or situations. A secondary objective is for the people who are administering the drill to validate procedures, clarify roles and identify operational process gaps.

In the school safety context, it is critical to distinguish between drills and exercises. Drills are for staff and students, and are educational opportunities to practice a life safety skill.

EXERCISE
The overall learning objective of an exercise is to test response, capacity and resources across the system. An exercise often includes a description or enactment of an incident, depending on the type of exercise that’s being conducted.

Exercises are broader in scope. These typically present a hypothetical emergency scenario (hurricane, earthquake, biochemical emergency, etc.) designed to encourage people to think on their toes, work together, and apply lessons learned from drills.

Invite people from your community to participate as volunteers in an Exercise, or to observe it. You will probably be introducing scenarios they have thought about; this level of engagement can be quite useful.

A Tabletop Exercise is a roundtable session administered by a facilitator. Team members discuss their roles and share observations regarding a simulated emergency scenario. It’s designed to test each member’s ability to refer and react to their role in the emergency plan, as well as their readiness to communicate with other members as needed. These usually run a few hours in duration, and are highly valuable for identifying the unique threats in each community.

In a Functional Exercise, participants perform their duties in a simulated emergency environment. Functional exercises typically focus on specific team members and/or procedures, and are often used to identify process gaps associated with multi-agency coordination, command and control.

A Full-Scale Exercise is similar in execution to a functional exercise, and is as close to the real thing as possible. It can include employees from multiple functions, community first responders, local businesses, and regulatory agencies. This type of exercise should utilize, to the extent possible, the actual systems and equipment that would be dispatched during a real event. From a duration standpoint, full-scale exercises often take place over the course of an entire business day.

PRACTICE
Once training has been delivered, practice is recommended prior to any drill. This may initially involve a discussion between staff and students to:

- Find various exit routes in advance of an Evacuation drill;
- Discuss ways to protect oneself from various weather hazards prior to a Shelter drill;
- Identify Safe Zones within a classroom and practice moving students to those zones prior to a Lockdown drill;
- Talk about situations that may require a Secure or Hold action.
LOCKDOWN DRILLS

LOCKDOWN DRILL GUIDANCE
A critical aspect in implementing the SRP with fidelity is the Lockdown Drill. Successful drills provide participants with the “muscle memory” should an actual Lockdown occur. Drills also reveal deficiencies that may exist in either procedures, training or personnel.

Understand that a lockdown drill is for practicing an action, not an event. An actual lockdown can occur due to a variety of threatening situations which may present an immediate and ongoing danger to the safety of students, staff and visitors within a building.

PREPARATION
Prior to drilling, students, staff and administration should be trained on the SRP and have had time to review the material. The safety team should also verify with law enforcement their use of the SRP on the campus.

Instructors should take time with students to identify and occupy a “Safe Zone” in the classroom where they cannot be seen through corridor windows. If visibility in a classroom is problematic, window coverings or alternative locations should be identified. Speak with local law enforcement about their preference about using window coverings.

Additionally, the following instructions should be delivered to students.

1. Locate yourself at a point in the classroom where you can no longer see out the corridor window.
3. Refrain from texting during drills.

PARTNERSHIPS
Campus level drills typically need a decent amount of staff support. If the school does not have many emergency service or security staff, one key partnership could be with local emergency services. Law enforcement, firefighters or emergency medical teams may be willing to help staff and cooperatively execute a Lockdown drill.

THE EMERGENCY RESPONSE TEAM
A common practice is for the campus to have a pre-identified Emergency Response Team which can be the same as the Safety Team, but may include others who are ‘on-call’ to respond to an emergency.

It is not uncommon for the safety team to survey the staff population for prior emergency response, military or law enforcement experience for placement in the team.

THE LOCKDOWN DRILL TEAM
The Lockdown Drill Team is a little different than the Emergency Response Team. During an actual Lockdown, members of the Emergency Response Team may be in classrooms or administrative offices in Lockdown mode and unable to assist with the response.

The ideal Lockdown Drill Team should include all campus emergency service or security staff, facilities managers and any local emergency service or law enforcement partners. For larger campuses it’s important to have enough people on the team to conduct the drill in a timely manner.

STAFF NOTIFICATION
When Lockdown Drills are first being introduced, it is absolutely okay to tell people in advance. There may be some who are adversely affected by surprise drills.

PEOPLE WITH SPECIAL NEEDS
It is critical to identify any specific issues that may cause challenges for people with special needs or disabilities and incorporate appropriate actions for notification prior to drills. It is not recommended that additional assistance be provided in special needs areas for drills, UNLESS this assistance is part of the plan and those resources will be assigned in an actual emergency.

THE LOCKDOWN DRILL TEAM BRIEFING
Prior to the Lockdown Drill a short planning meeting with the Lockdown Drill Team should occur. The agenda is simple:

1. Review the floor plan and team member assignments;
2. Expected drill duration;
3. The door knock and after-action conversation;
4. Windows;
5. Potential student or staff distress.
6. Announcing the lockdown drill

At the conclusion of the drill, the team should reconvene for a debrief, and use this time to review portions of the safety plan. A good debriefing may reveal some gaps and areas for improvement in the plan.

OPTIONS-BASED TRAINING
Instructors and students should be educated about the options that can be used in an active threat situation. Realistically, they’re not always in their classrooms or behind closed doors as they go throughout their day; because of this, they should be taught additional strategies that go beyond Locking Down in a classroom. Discussion can include what to do when in a bathroom or common area if an threat arises. This is where self-evacuation strategies play a roll.
MATERIALS LIST
There are a number of materials available in the Appendix of this book (extract the separate PDF pages after downloading this book) and also ready to download from the website. Materials include:

- Lockdown Drill Worksheet
- Public Address Poster (download the Word version from the website to edit for local hazards)
- Student and Staff Handout in English and Spanish (a fully accessible version can be downloaded from the website)
- Letter-size poster in English and Spanish
- Tabloid-size poster in English and Spanish (download from website)
- Drill in Progress poster
- Building is Secure poster
- Building is Secure, Doors are Monitored poster
- Red/Green/Alert Card
- Red/Green/Med Card
- Red/Green/Roll Card

CLASSROOM POSTER
Placing Posters is an essential step in full implementation of the SRP. The poster should be displayed in every office, classroom near all entries, and near the entrances to cafeteria, auditorium and gym.

These are available for download at http://iloveuguys.org at no charge.

Note to Printers
This material may be duplicated for distribution per “SRP Terms of Use,” which read as follows:

Terms of Use: District/school is responsible for physical material production of any online resources provided by The Foundation. The District/school is not required to utilize printing services provided by The Foundation for production of support materials.

What this means: You may print this material for them.

Terms of Use: School District agrees to incorporate the SRP using the terms of art and the associated directives as defined in the Program Description.

What this means: The school, district, agency or organization may place their logo and/or name on printed material to personalize it. They may not substantively change the wording or actions, except as it applies to hazards specific to their region.

STUDENT SAFETY
A critical ingredient in the safe campus recipe is the uniform response to an incident. Weather events, fires, accidents, intruders and other threats to student and staff safety are scenarios that are planned and trained for by campus administration.

THE STANDARD RESPONSE PROTOCOL
The Standard Response Protocol (SRP) is based on an all-hazards approach as opposed to individual scenarios. Like the Incident Command System (ICS), SRP utilizes clear common language while allowing for flexibility in protocol.

Our campus is expanding the safety program to include the SRP, which is based on these five actions: Lockout, Lockdown, Evacuate and Shelter. In the event of an emergency, the action and appropriate direction will be called on the public address system and delivered to your campus safety application.

Timely notification is essential with any type of crisis. Please verify that your contact information is current in the campus notification system.

LOCKDOWN
“Locks, Lights, Out of Sight”
Lockdown is called when there is a threat or hazard inside the building.

Students:
- Move away from sight
- Maintain silence
- Prepare to evade or defend

Instructors and staff:
- Recover people from hallway if it is safe to do so
- Lock classroom door
- Lights out
- Move away from sight
- Maintain silence
- Do not open the door
- Prepare to evade or defend

EVACUATE
“To a Location”
Evacuate is called to move people from one location to another.

Students:
- Leave stuff behind if required to
- If possible, bring your phone
- Show your hands
- Be prepared for alternative instructions

Instructors and staff:
- Bring roll sheet and Go Bag (unless instructed not to take anything with them, dependent on reason for evacuation.)
- Lead students to evacuation location
- Account for students, visitors and others
- Report injuries or problems to first responders using Red Card / Green Card method.

SHELTER
“State Hazard and Safety Strategy”
Shelter is called when the need for personal protection is necessary.

Hazards might include:
- Tornado
- Hazmat
- Earthquake
- Tsunami

Safety Strategies might include:
- Evacuate to shelter area
- Seal the room
- Drop, cover and hold
- Get to high ground

Students:
- Use appropriate safety strategies for the hazard

Instructors and staff:
- Lead appropriate safety strategies for the hazard
- Account for students, visitors and others
- Report injuries or problems to first responders using Red Card / Green Card method.
PROTOCOLO DE RESPUESTA ESTÁNDAR

El Protocolo de Respuesta Estándar (SRP por su sigla en inglés) se basa en un método para todo tipo de riesgos en vez de para situaciones particulares. Al igual que el Sistema de Comando de Incidentes (ICS por su sigla en inglés), el protocolo SRP utiliza un lenguaje común claro al mismo tiempo que posibilita la flexibilidad en el protocolo.

Nuestros campus va a ampliar el programa de seguridad a fin de incluir el protocolo SRP, el cual se basa en estas cinco acciones: Lockout (acceso bloqueado), Lockdown (cierre de emergencia), Evacuate (evacuén) y Shelter (busquen resguardo). Si se produce una situación de emergencia, se anunciarán la acción y las instrucciones adecuadas por el sistema de comunicaciones con amplificación y se difundirán mediante nuestra aplicación de seguridad para el campus.

La notificación puntual es esencial en cualquier situación de crisis. Por favor, compruebe que el sistema de notificación del campus cuenta con su información de contacto actualizada.

HOLD! (¡ESPEREN!) “En su aula o área”

La espera (Hold) se establece cuando es necesario despejar temporalmente los pasillos y áreas comunes.

Estudiantes:
• Despejen los pasillos y permanezcan en su área o aula hasta que se les avise
• Continúen con la rutina de las aulas

Docentes y personal:
• Llenen a las personas en los pasillos a dependencias interiores
• Cierren la puerta y echen la llave
• Cuenten a los estudiantes, visitantes y otras personas presentes
• Continúen con la rutina de las aulas

SECURE! (¡PROTEJAN!)

“Vayan adentro. Echen llave a las puertas exteriores”

La protección del campus (Secure) se establece cuando hay algún tipo de amenaza o riesgo fuera del edificio.

Estudiantes:
• Regresan al edificio
• Continúan con la rutina de las aulas

Docentes y personal:
• Cierren la puerta y echen la llave
• Cuenten a los estudiantes, visitantes y otras personas presentes
• Continúen con la rutina de las aulas

EVACUATE! (¡EVACUACIÓN!)

“A un lugar determinado”

La evacuación (Evacuate) se establece para llevarse a las personas de un lugar a otro.

Estudiantes:
• Dejen sus cosas donde estén si se les pide que lo hagan
• Mantengan las manos a la vista
• Estén preparados para recibir instrucciones alternativas

Docentes y personal:
• Llenen la lista de estudiantes y la bolsa para emergencias [Go Bag] (a menos que les indiquen que no se lleven nada, dependiendo del tipo de evacuación).
• Dirijan a los estudiantes, visitantes y otras personas presentes a la ubicación que se haya establecido para las situaciones de evacuación
• Cuenten a los estudiantes, visitantes y otras personas presentes
• Informen de lesiones o problemas al personal de respuesta inmediata mediante el método de Tarjeta roja / Tarjeta verde.

SHELTER! (¡BUSQUEN RESGUARDO!)

“Estrategias de seguridad y para situaciones de riesgo del estado”

La búsqueda de resguardo (Shelter) se establece cuando es necesario proteger a las personas.

Los riesgos pueden incluir:
• Tornado
• Materiales peligrosos
• Terremoto Tsunami

Las estrategias de seguridad pueden incluir:
• Evacuar a un área resguardada
• Sellar las aulas
• Agacharse, cubrirse, agarrarse
• Dirigirse a terreno elevado

Estudiantes:
• Usen las estrategias adecuadas de seguridad y para situaciones de riesgo

Docentes y personal:
• Dirijan las estrategias adecuadas de seguridad y para situaciones de riesgo
• Cuenten a los estudiantes, visitantes y otras personas presentes
• Informen de lesiones o problemas al personal de respuesta inmediata mediante el método de Tarjeta roja / Tarjeta verde.

EN CASO DE EMERGENCIA
TOMEN MEDIDAS

HOLD! (¡ESPEREN!) En su salón o área. Despejen los pasillos.

ESTUDIANTES
Despejen los pasillos y permanezcan en su área o aula hasta que se les avise
Continúen con la actividad rutinaria

ADULTOS
Cierren la puerta y echen la llave
Cuenten a los estudiantes, visitantes y otras personas presentes
Continúen con la actividad rutinaria

SECURE! (¡PROTEJAN!)
Vayan adentro. Echen llave a las puertas exteriores.

ESTUDIANTES
Regresen adentro
Continúen con la actividad rutinaria

ADULTOS
Lleven a todas las personas adentro
Echen llave a las puertas exteriores
Mantengan la alerta sobre lo que ocurre en su entorno
Cuenten a los estudiantes, visitantes y otras personas presentes
Continúen con la actividad rutinaria

LOCKDOWN! (¡CIERRE DE EMERGENCIA!)
Echen llave, apaguen las luces, escóndanse.

ESTUDIANTES
Despláncense a un lugar donde no se les vea
Guarden silencio
No abran la puerta
Prepárense para evadirse o defenderse

ADULTOS
Lleven a las personas en los pasillos a dependencias interiores si es posible hacerlo de forma segura
Echen llave a las puertas interiores
Apaguen las luces
Despláncense a un lugar donde no se les vea
Guarden silencio
No abran la puerta
Prepárense para evadirse o defenderse

EVACUATE! (¡EVACUEN!)
(Es posible que se especifique un lugar determinado)

ESTUDIANTES
Dejen sus cosas donde estén si se les pide que lo hagan
Llévense sus teléfonos
Se seguir instrucciones

ADULTOS
Dirijan la evacuación a un lugar determinado
Cuenten a los estudiantes, visitantes y otras personas presentes
Avisen si entre falta alguien, hay personas de más o hay heridos

SHELTER! (¡BUSCAR RESGUARDO!)
Riesgo y estrategia de seguridad

ESTUDIANTES
Utilizar una estrategia de seguridad adecuada para el peligro

ADULTOS
Dirijan la estrategia de seguridad
Cuenten a los estudiantes, visitantes y otras personas presentes
Avisen si entre falta alguien, hay personas de más o hay heridos

SCHOOL IS SECURED
NO ONE IN OR OUT

ESCUELA BAJO PROTECCIÓN
NADIE PUEDE ENTRAR
BUILDING IS SECURED
MONITORED ENTRY AND CONTROLLED RELEASE

EDIFICIO BAJO PROTECCIÓN
ENTRADA VIGILADA Y SALIDA CONTROLADA
HOLD
In Your Classroom Or Area
Students:
• Clear the hallways and remain in the area or room until “All Clear” is announced
• Do business as usual
Instructors and staff:
• Recover students from the halls
• Lock classroom door
• Account for students, visitors and others
• Do business as usual

SECURE
Get Inside. Lock Outside Doors.
Students:
• Return to inside of building
• Do business as usual
Instructors and Staff:
• Bring everyone indoors
• Lock exterior doors
• Increase situational awareness
• Account for students, visitors and others
• Do business as usual

LOCKDOWN
Locks, Lights, Out Of Sight
Students:
• Move away from sight
• Maintain silence
• Do not open the door
• Prepare to evade or defend
Instructors and Staff:
• Recover students from hallways if possible
• Lock interior doors
• Turn out the lights
• Move away from sight
• Maintain silence
• Do not open the door
• Account for students and adults
• Prepare to evade or defend

EVACUATE
To Announced Location
Students:
• Leave stuff behind if required
• If possible, bring a phone
• Show your hands
• Be prepared for alternate instructions
Instructors and Staff:
• Lead evacuation to specified location
• Account for students, visitors and others
• Notify if missing, extra or injured students or adults

SHELTER
For A Hazard Using Safety Strategy
Strategies might include:
• Evacuate to shelter area
• Seal the room
