PERSONAL SAFETY
The safety and security of employees and visitors to our business facilities is of the utmost importance. The Standard Response Protocol (SRP) provides clear guidance on actions to be taken by all occupants of a facility in the event of a crisis. This is designed to provide consistent, clear, shared language, and a series of actions to be taken by occupants.

SRP
Our organization is expanding the safety program to include the SRP. In the event of an emergency, the action and appropriate direction will be announced publicly and broadcast through our internal communication system.
