

THE STANDARD REUNIFICATION METHOD

One-Day Reunification Exercise

Classroom Training and Functional Exercises Using the
Standard Reunification Method

ABOUT THE STANDARD REUNIFICATION METHOD

The Standard Reunification Method (SRM) provides school and district safety teams with proven methods for planning, practicing and achieving a successful reunification.

ABOUT THE SEMINAR

The One-Day Standard Reunification Method - Reunification Exercise (SRM-REx) is a light version of our full two-day training, designed for organizations that have already completed Standard Response Protocol (SRP) and Standard Reunification Method (SRM) training. This training reinforces key reunification concepts while providing an opportunity to practice the process in a condensed format.

The classroom learning portion in the morning delivers an SRP and SRM overview before transitioning into hands-on functional exercises in the afternoon. Participants will rotate through different roles-experiencing reunification as part of the reunification team, a student, or a parent-gaining practical insight into executing a successful reunification.

Designed for school and district personnel, public safety officials, emergency managers, mental health professionals, and other communities, the One-Day SRM-REx strengthens coordination and collaboration among key reunification stakeholders.

WHO SHOULD ATTEND

Educators, Administrators, School and District Safety Teams, Campus Supervisors, Law Enforcement, Fire/EMS, Emergency Managers, Victim Advocates

DETAILS

ADDITIONAL MATERIALS

The REx box contains all the necessary materials for conducting a Reunification Exercise including vests, lanyards, Role ID Badges, student & parent IDs, job action sheets, roster data, and more!
